INTRODUCTION

PROFESSIONAL EXPERIENCE

He worked as architectural designer, both in projects for recovering the pre-existing heritage and projects created from scratch in various fields, such as public works, health infrastructures, housing, urban, territorial and environmental design.

He worked as Project Manager, both in Italy and in other Countries, for the implementation of different types of projects, following them from preliminary stages to the draft of closure documents (technical and economic feasibility studies, preliminary design, executive project, technical and administrative documents, technical assistance for examination of tenders and supervision of the works).

PROFESSIONAL ACTIVITY

From 1984 to 1986 he collaborated to the execution of prestigious architectural projects and took part in contests, concerning recovery and directional building design, for Studio Paolo Portoghesi Associates of Rome.

From 1986 to 2000 he collaborated with Studio Bichara s.r.l of Rome, supervising projects of housing and urban restoration, projects for new buildings, execution of new executive projects for public health, housing and directional buildings.

He provided technical advice concerning execution, coordination of multidisciplinary projects and direction of works both in Italy and other countries, working as representative for contracting authorities.

Since 2000 he has worked as freelance professional, giving technical assistance, projecting and directing works and coordinating security for both public and private clients in the field of new buildings and restoration for housing, school, commercial, health, directional buildings and landscape architecture.
